 Hot Springs Seminars 2014, 2015

American Veterinary
 Chiropractic
 Association

Recognized as the World Leader in Animal Chiropractic

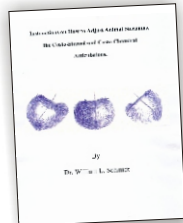

Seminars

“I teach how to adjust each vertebra lightly without the cram and jam and without the haphazard palpation and adjusting techniques that I have seen being taught.”

Dr. William L. Schmidt

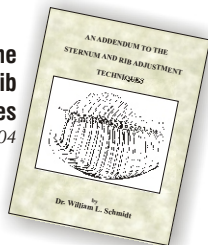

Author

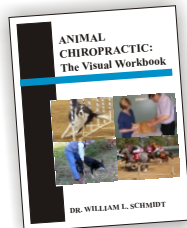

Instructions on How to Adjust Animal Sternum, the Costo-Sternal and Costo-Chondral Articulations
Published 2001

An Addendum to the Sternum and Rib Adjustment Techniques
Published 2004

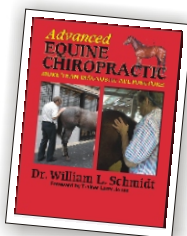

The vast majority of horses have sternum and rib misalignment which effects, among other things, their ability to breathe, lack of drive off the front and rear ends or inability to stop. For correction the center of rotation has got to be followed so as not to hurt yourself or the animal.

Animal Chiropractic: The Visual Workbook
Published 2008

This Visual Workbook was designed for anyone who ever asked the question "How can I tell if my pet needs a chiropractic adjustment?"

Advanced Equine Chiropractic: More Than Diagnostic Acupuncture (Includes 2 hour DVD)
Published 2012

Discusses and demonstrates embryological and sympathy points unknown and unpublished until this time that will excite many animal chiropractors who want to improve their diagnosis skills.
